

## California Women's Well-Being Index Poverty Fact Sheet

The California Women's Well-Being Index provides a comprehensive, composite measure of how women are faring in each of the state's 58 counties. The Index encompasses five "dimensions" – Health, Personal Safety, Employment & Earnings, Economic Security, and Political Empowerment – each of which is made up of six indicators. This fact sheet shows statewide data by race and ethnicity for the Poverty Indicator, as well as the value and rank for all 58 counties.

### Percentage of Women Age 18 and Over Living in Poverty, 2010-2014

Note: "White" excludes individuals who also identify as "Latina," which means that the White and Latina categories are mutually exclusive. For race categories other than White, individuals who identify as Latina may be counted in both a racial category (e.g., "Black") and in the Latina category. As such, Latina and the non-White racial categories are not mutually exclusive.
