What’s a Tax Expenditure?

“Backdoor spending through the tax code.”

“Spending in disguise.”

“No different from any other federal program that spends taxpayer money.”

Tax expenditures for building wealth

The rising cost of unfair upside down tax programs

Calculations based on data from the Office of Management and Budget (2016) and Tax Policy Center (2017). Totals include cost estimates of 37 individual tax expenditures and cuts to the estate tax.

While Congress spends more to help the wealthy build wealth, everybody else gets little or nothing at all.

Calculations based on data from the Urban-Brookings Tax Policy Center (2015). “Working Families” defined as those with $50,000 or less in income. Dollar amounts reflect the average benefit in 2015 from several tax programs for tax units in the two income categories.
Three Takeaways

1. Tax expenditures are government spending

2. Spending on these tax programs far outweighs most other government welfare spending

3. Much of this spending goes to the wealthiest, exacerbating wealth inequality
